Office Action Summary

Application No.

10/647,235

Applicant(s)

WATANABE ET AL.

Examiner

Jason Y. Pahng

Art Unit

3725

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 22 May 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1,2,4-9,11,13 and 14 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1,2,4-9,11,13 and 14 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 112

The amendment overcomes the claim rejections under 35 U.S.C. 112 made in the last Office action.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, as well as can be understood, 2, 5, 6, and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chang in view of Bennett et al. (US 6,758,392) and Colgate, Jr. (US 4,547,002).

With regard to claims 1, 2, and 5, Chang discloses substantially all of the claimed structure including:

1. a destroy process unit (1) that destroys data stored in an electronic data storage device of an image display member or a credit card;
2. a shredding process unit (20, 30) that shreds the image display member or a credit card; and
3. a sensing unit (14).

Art Unit: 3725

Chang discloses a sensing unit (14) to detect an image display unit, but does not disclose detecting an electronic data storage device or a control unit. In a closely related art, disclose detecting an electronic data storage device. In a closely related art, Bennett discloses a credit card destroy process unit with a sensor and controller capable of detecting an electronic data storage device in order to control the destruction (column 1, lines 28-39 and 62-66). Therefore, it would have been obvious to one skilled in the art at the time the invention was made to provide Chang with a sensor and controller capable of detecting an electronic data storage device in order to control the destruction, as taught by Bennett. Although Chang does not explicitly disclose a display member comprising paper, Colgate is referenced to show that credit card may be made of either plastic or paper.

With regard to claim 6, Chang discloses an insertion port (12) wherein the destroy process unit (1 and including 15) is disposed closer to the insertion port (12) than the shredding process unit (20, 30).

With regard to claim 11, Chang discloses a sensor (13) which senses the presence of an image display member in order to control at least the shredding process.

Claims 4 and 7-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chang (US 6,676,050) in view of Bennett et al. (US 6,758,392) and Colgate, Jr. (US 4,547,002) as applied above, further in view of Abramson (US 4,931,770) and Matsumoto et al. (US 4,879,724). Claim 4 calls for at least one of electric or magnetic application, and claim 9 calls for electromagnetic wave to overwrite another data to destroy data. In a closely related art, Matsumoto discloses a rewritable optical disk

Art Unit: 3725

memory system (column 1, lines 21-23) and therefore inherently discloses overwriting another data to in order to destroy data. In another closely related art, Abramson teaches that using abrasive, cutting, chemical, magnetic, or other suitable component adapted to destroy information on a disc is well known in the art (column 2, lines 30-32). Therefore, it would have been obvious to one skilled in the art at the time the invention was made to provide Chang (as modified) with a rewritable optical disk memory system in order to destroy data in a disc, as such is well known in the art and taught by Matsumoto and Abramson.

With regard to claim 7, the modified device of Chang is capable of shredding or applying electric field. Whether the image display unit is shredded first and electric field is applied later or electric field is applied first and shredded later is not relevant. How an apparatus is used is considered in a process claim and is not germane to the patentability of an apparatus claim.

Claim 8 does not add any further limitation to claim 4. The use of electric field claimed in claim 4 would inherently include application of voltage.

Claims 13 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chang (US 6,676,050) in view of Bennett et al. (US 6,758,392) and Colgate, Jr. (US 4,547,002) as applied above, further in view of Bley (US 6,038,012). Claims 13 and 14 call for the electronic data storage device to comprise an IC chip. In a closely related art pertinent to the problem, Bley discloses an electronic data storage device comprising an IC chip (column 1, lines 56-58) in order to make a card to be a smart card. Therefore, it would have been obvious to one skilled in the art at the time the

invention was made to provide Chang (as modified) with an electronic data storage device comprising an IC chip in order to make his card to be a smart card, as taught by Bley.

Response to Arguments

Applicant's arguments filed May 22, 2006 have been fully considered but they are not persuasive.

Applicant argues that "Bennett does not teach or suggest sensing as to whether the paper includes an electronic data storage device" (page 6). Applicant explains that, in Bennett, whether the card is to be destroyed is determined based on the flag stored in the magnetic stripe of the card and not whether the magnetic stripe exists on the card. Examiner would like to point out that there are several ways to sense whether a paper includes an electronic data storage device. One of the ways may be by sensing a flag stored in a magnetic stripe of a card. Therefore, Bennett does teach sensing as to whether the paper includes an electronic data storage device.

Applicant also argues that one of ordinary skill in the art would not have been motivated to replace Chang's compact disc with colgate's paper credit card (page 7). However, the claim rejection is based on Chang's credit card as set forth in the last Office action. One of ordinary skill in the art would, in fact, be motivated to replace Chang's credit card (column 1, line 65) with colgate's paper credit card.

Applicant does not present additional new arguments regarding the rest of the claims.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

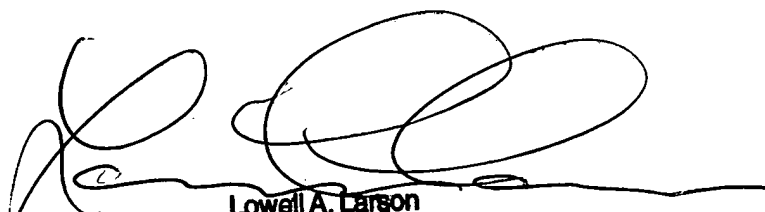

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason Y. Pahng whose telephone number is 571 272 4522. The examiner can normally be reached on 9:00 AM - 7:00 PM, Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Derris Banks can be reached on 571 272 4419. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
